Fixed Dome Network Camera FD8363

Full HD • Smart Focus System •
Smart IR • IP66 • Vandal-proof

VIVOTEK FD8363 is a professional outdoor dome network camera, offering 2-Megapixel or 1080p Full HD resolution with superb image quality up to 30 fps. As with other true day/night models, the camera comes with a removable IR-cut filter and 15-meter IR illuminators to provide great clarity 24 hours a day. It is especially suitable for monitoring wide open outdoor areas such as building entrances, airports, or applications requiring accurate identification.

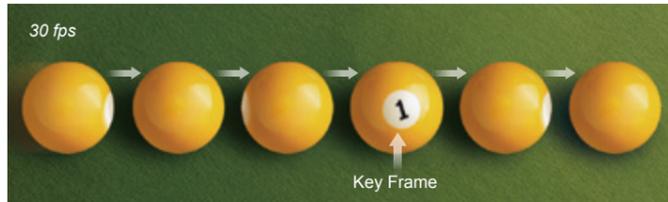

For installers, properly adjusting the focus of a megapixel network camera can be difficult due to the image detail. Thus, VIVOTEK has introduced the revolutionary Smart Focus System, including Easy Focus Button and Remote Focus to make installation and image adjustment easier. VIVOTEK has adopted lenses with a built-in stepper motor that the installer can use to remotely control the focal length and precisely adjust the camera focus, offering hassle-free installation and maintenance.

The IP66-rated housing is designed to help the camera body withstand rain and dust and ensures operation under a multitude of harsh weather conditions, while its metal vandal-proof housing effectively provides robust protection from vandalism. With other advanced features such as WDR enhanced, tamper detection, 802.3af compliant PoE, microSD/SDHC/SDXC card slot for on-board storage, video cropping, and e-PTZ functionality, the FD8363 provides the most robust solution suitable for demanding outdoor environments.

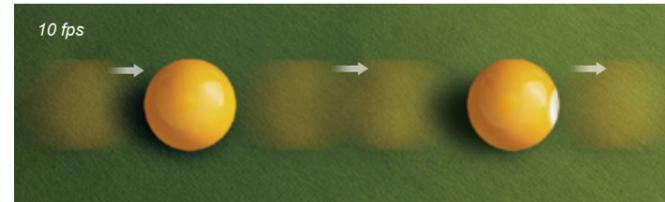

SUPREME

1080p Resolution at Full Frame Rate

The VIVOTEK FD8363 is able to transmit 30 fps @ 1080p with H.264 compression, while conventional megapixel cameras generally only achieve 10 to 15 fps due to hardware limitations. The ability to view and record footage at a full frame rate enables much more effective surveillance.

For example, if a person or object of interest passes quickly through the camera's field of view during an event, a 10 fps frame rate might mean only a single frame with the target is captured, while the FD8363 would capture three frames, providing a fuller record of the event and more reliable identification of the target.

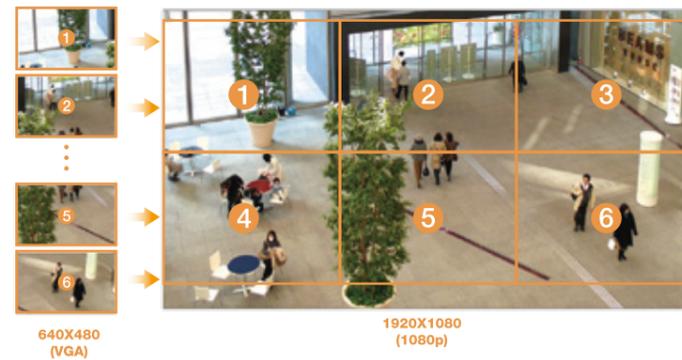

Wide Coverage, Exceptional Details

Compatible with the HDTV (16:9) standard, the FD8363 provides surveillance coverage for an area up to six times larger than possible with a VGA camera, significantly reducing the number of cameras required.

The FD8363 is especially well suited to monitor broad spaces such as shopping mall, airport, and hotel lobby, etc. In addition, it is excellent for applications requiring accurate recognition for post-content analysis, such as the identification of people or license plates.

Consistent Surveillance Performance

• Adapted for High-contrast Lighting Conditions

When a camera is used in a high contrast, backlight, glare, or light reflective environment such as a building entrance, ATM, or window, a subject may appear dark and unrecognizable. WDR Enhanced technology compensates for the unbalanced lighting, restoring detail throughout the field of view, so as to give user unparalleled visibility to identify images.

• Smart IR

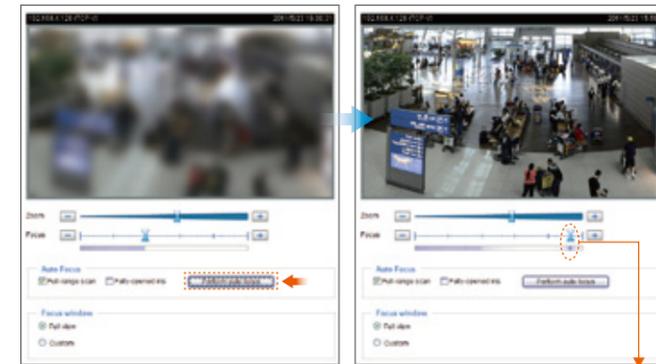

When the Smart IR function is enabled, the camera automatically adjusts the IR lighting intensity in order to avoid overexposure in night mode and is highly beneficial in capturing usable video when the object of interest is close to the camera and IR LEDs.

Smart Focus System

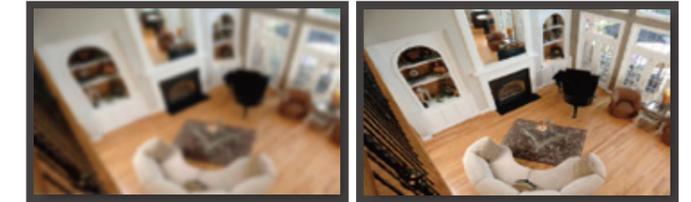

• Remote Focus

To facilitate easier installation and adjustment, the FD8363 has adopted a lens with a built-in stepper motor that the installer can use to remotely control the focal length and precisely adjust the camera focus via the configuration webpage.

• Easy Focus

The installer can also easily adjust the focus by pushing the auto focus button on camera body. The lens module will automatically adjust the focus to the best value, offering hassle-free installation and maintenance.

Enhanced Security

• Vandal-proof IK10-rated Housing

Equipped with a protective housing, the FD8363 are secured from vandalism, making it suitable for high-risk environments. The metal base and polycarbonate cover enable the FD8363 to withstand high impacts, thereby ensuring functional operation at all times.

FD8363 | Fixed Dome Network Camera

- 2-Megapixel CMOS Sensor
- 30 fps @ 1920x1080
- 3 ~ 9 mm Motorized, DC-iris Lens
- Removable IR-cut Filter for Day & Night Function
- Built-in IR Illuminators, Effective up to 15 Meters
- Built-in Smart IR to Avoid Overexposure
- WDR Enhancement for Unparalleled Visibility in High Contrast Environments
- Real-time H.264, MPEG-4, and MJPEG Compression (Triple Codec)
- Smart Focus System for Remote and Easy Focus Adjustment
- Vandal-proof IK10-rated and Weather-proof IP66-rated Housing
- Built-in 802.3af Compliant PoE
- Built-in MicroSD/SDHC/SDXC Card Slot for On-board Storage
